

ZINEMA7
HOTEL****

Zinema7 Commitments

We are more than a hotel inspired by the cinema

At the Zinema7 Hotel we have implemented protocols to minimise our environmental impact. We apply energy and water conservation technologies and make improvements every day to preserve our environment.

At Zinema7, the cinema and respect for our planet guide us towards living together in harmony. Your stay not only creates memories, but also contributes to the preservation of our planet.

We invite you to play a role in the adventure of seeking a more sustainable future.

Let's take care of the environment together

At the Hotel Zinema7 and the Bistroteka Zinema7 we prioritise the consumption of local products. Our cuisine supports local producers, and we also promote purchasing from small producers.

Digitalisation of check-in

Recycling containers

100% renewable energy contracted

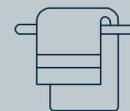

Dispensers instead of individual amenities

Elimination of plastic

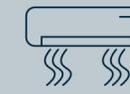

Km0 gastronomic products

Changes of towels and bedclothes upon request

Zero waste: waste management

Control and monitoring of air conditioning

Zero Waste

- Selective collection of organic waste
- We contribute to the circular use of oil with the company Ekogras
- We contribute to the circular use of coffee: we collaborate with the Nespresso sustainability programme
- Elimination of single-dose coffee pods in breakfasts
- Elimination of single-use amenities: dispensers instead of individual containers in the hotel rooms
- Returnable glass water bottles instead of plastic bottles
- Digitalisation rather than stationery: online check-in available with Civitfun integration

Management and purchasing

- Our purchasing policy is governed by a strict criterion of sustainability in the most important consumable items.

Water consumption

- Water in jugs available in the dining room
- Water dispenser at breakfasts instead of bottled water
- We have water flow reducers in all the rooms
- All our toilets are dual flush with two buttons for higher and lower flow
- All rooms have instructions for changing towels as decided by the guest

Energy consumption

- We limit the air conditioning temperature in common areas to 22°C (with a variation of approximately 2°C).
- We use renewable contracted energy
- We are in the process of installing solar panels

Community

- Increase in the number of recycling bins in different parts of the hotel.
- We prioritise the consumption of locally produced (“Km 0”) products
- Leftover food is used to feed the team, in this way avoiding the generation of more food waste
